Enclosure poles

		Dia- meter	Lengthe	Art.-Nr.	Price/Piece
Wooden	Fence poles	10	220	6000	€ 13,10
	Fence poles	8	200	6002	€ 7,70
	Fence poles	12	220	6004	€ 18,50
	Quare poles	10	300	6010	€ 9,60
	Quare poles	12	300	6011	€ 14,10
Recycling	Fence poles	10	200	6021	€ 20,00
Plastic	poles incl. insulators		156	6026	€ 2,20
	poles incl. insulators		125	6027	€ 2,10
T-Poles	Metalpole		182	6018	€ 8,00
	Metalpole		213	6009	€ 9,00
	+ insulator for Metalpole			6013	€ 0,40
Bongossi	Fence poles 6x6 cm		200	6028	€ 7,40
	Fence poles 8x8 cm		200	6003	€ 16,50

Asseby-tools

The most easiest way to set the poles is with using a hand-piledriver. If the ground is very hard use a ground-drill.

Hand pile-driver galvanized for poles to 10 cm	6007	€ 76,00
Ground-drill galvanized for 7 cm Diameter	6005	€ 50,00
galvanized for 9 cm Diameter	6006	€ 53,00

Gate-, Starter-, Junction-Insulator

The Multi-Functioning-Insulator for Start and Junction is an originally development from the house of Fink. The MF-Insulator consists of the MF-body, the mashine srew with nut and 2 clamps.

MF-Insulator 4 cm MF-Insulator incl. 2 extra clamps	6276	€ 3,90
6 cm MF-Insulator incl. 2 extra clamps	6376	€ 4,10
Spax-screws 6/40 to assembly per 50 piece	6073	€ 3,50

To reorder or Extra orders:

4 cm extra clamps per piece	6077	€ 0,80
6 cm extra clamps per piece	6177	€ 0,90
MF-Body	61780	€ 1,30
Mashine srew with nut	61792	€ 1,00

Like this you assemble the MF-Insulator as a junction :

For shure you can take the MF-Insulators completely to its pieces. This is important to exchange broken pieces and to dispose it (not until many years have past by)! You can also order every single piece Separately.

Direction for a correct funktioning electronic fence

The electric apparatus sends electronic impulses of 4 – 8000 Volt, but minimalized Ampere-pressure. Around the electronic ribbon there is build a magnetic field. The more the electronic ribbon is conductive, the stronger is the magnetic field. Insurances ask for a minimum pressure of 4000 V. The discharge energy at the ribbon is to be sed in Joule and tells the efficiency of the apparatus. The circuit closes with the bodily contact of the horse with the ribbon to the earth and so also to the grounded apparatus. The horse feels the impulse, that is unpleasant for horses and humans but harmless.
